

INFINITY WEEK FRIDAY lesson 1

B1 The future of medicine

Instruction: Follow these general guidelines. Use the links provided on the syllabus website. Underlined items are links to ADDITIONAL support.

[Aims](#)

Warm-up

- Click on the **Warm-up** link. Ask student to get into pairs. Student 1 sits with his/her back to the screen. Student 2 describes what is happening in the clip. Students turn around. Play the video again. Students predict the topic of the lesson.
- Optional: ask Star Trek fans to talk about the series.

Main activities

- Click on the **VIDEO** link. Play the video – please note that students do not need to understand most of what is said in the video. They just need to use visual cues to try and understand what the innovation is all about. Pause after each innovation (you needn't go through all of them) and ask students to use their own words to describe it.
- In pairs, students need to decide which innovation is the best and why.
- Students report back to the whole group.
- Students talk about their innovation. Encourage other students to ask questions.
- Optional: in pairs, students brainstorm ideas of other innovations that they would like to see in the future.
